

Accelerating Innovation for Government

Avanz Systems, Inc. is a women-owned small business that's driving modernization at federal agencies to meet today's transformational demands. We work closely with clients to solve complicated problems that evolve their mission and capabilities. Our people, processes, and technologies empower forward-thinking innovations, accelerate delivery of production-ready software, and create secure, high-quality solutions.

Our mission is to deliver best-in-class technology solutions, providing superior customer service, and exceeding customer expectations.

DIFFERENTIATORS

Integrated Services: Integrating our strategy, design, and development services to bring success and accountability on a project.

Track Record & Customer Focus: Our diverse experience and a record of success in designing, developing and implementing complex mission critical systems on On-Premise and Cloud.

Automation & DevSecOps: We leverage tools to build automation pipeline for continuous integration and continuous deployment (CI/CD) with the security best practice to deploy and test early & often.

Cloud Implementation: We provide unparalleled insight into migration of complex solutions into Cloud with multiple interfaces.

Development Methodology: Our Scrum Agile software development approach, works to reduce cost, risks and time-to-market.

Solution Modernization: We bring experience managing and modernizing legacy applications to Cloud using cloud native capabilities.
